

The Essentials Collection

VOL. 2

Caribou

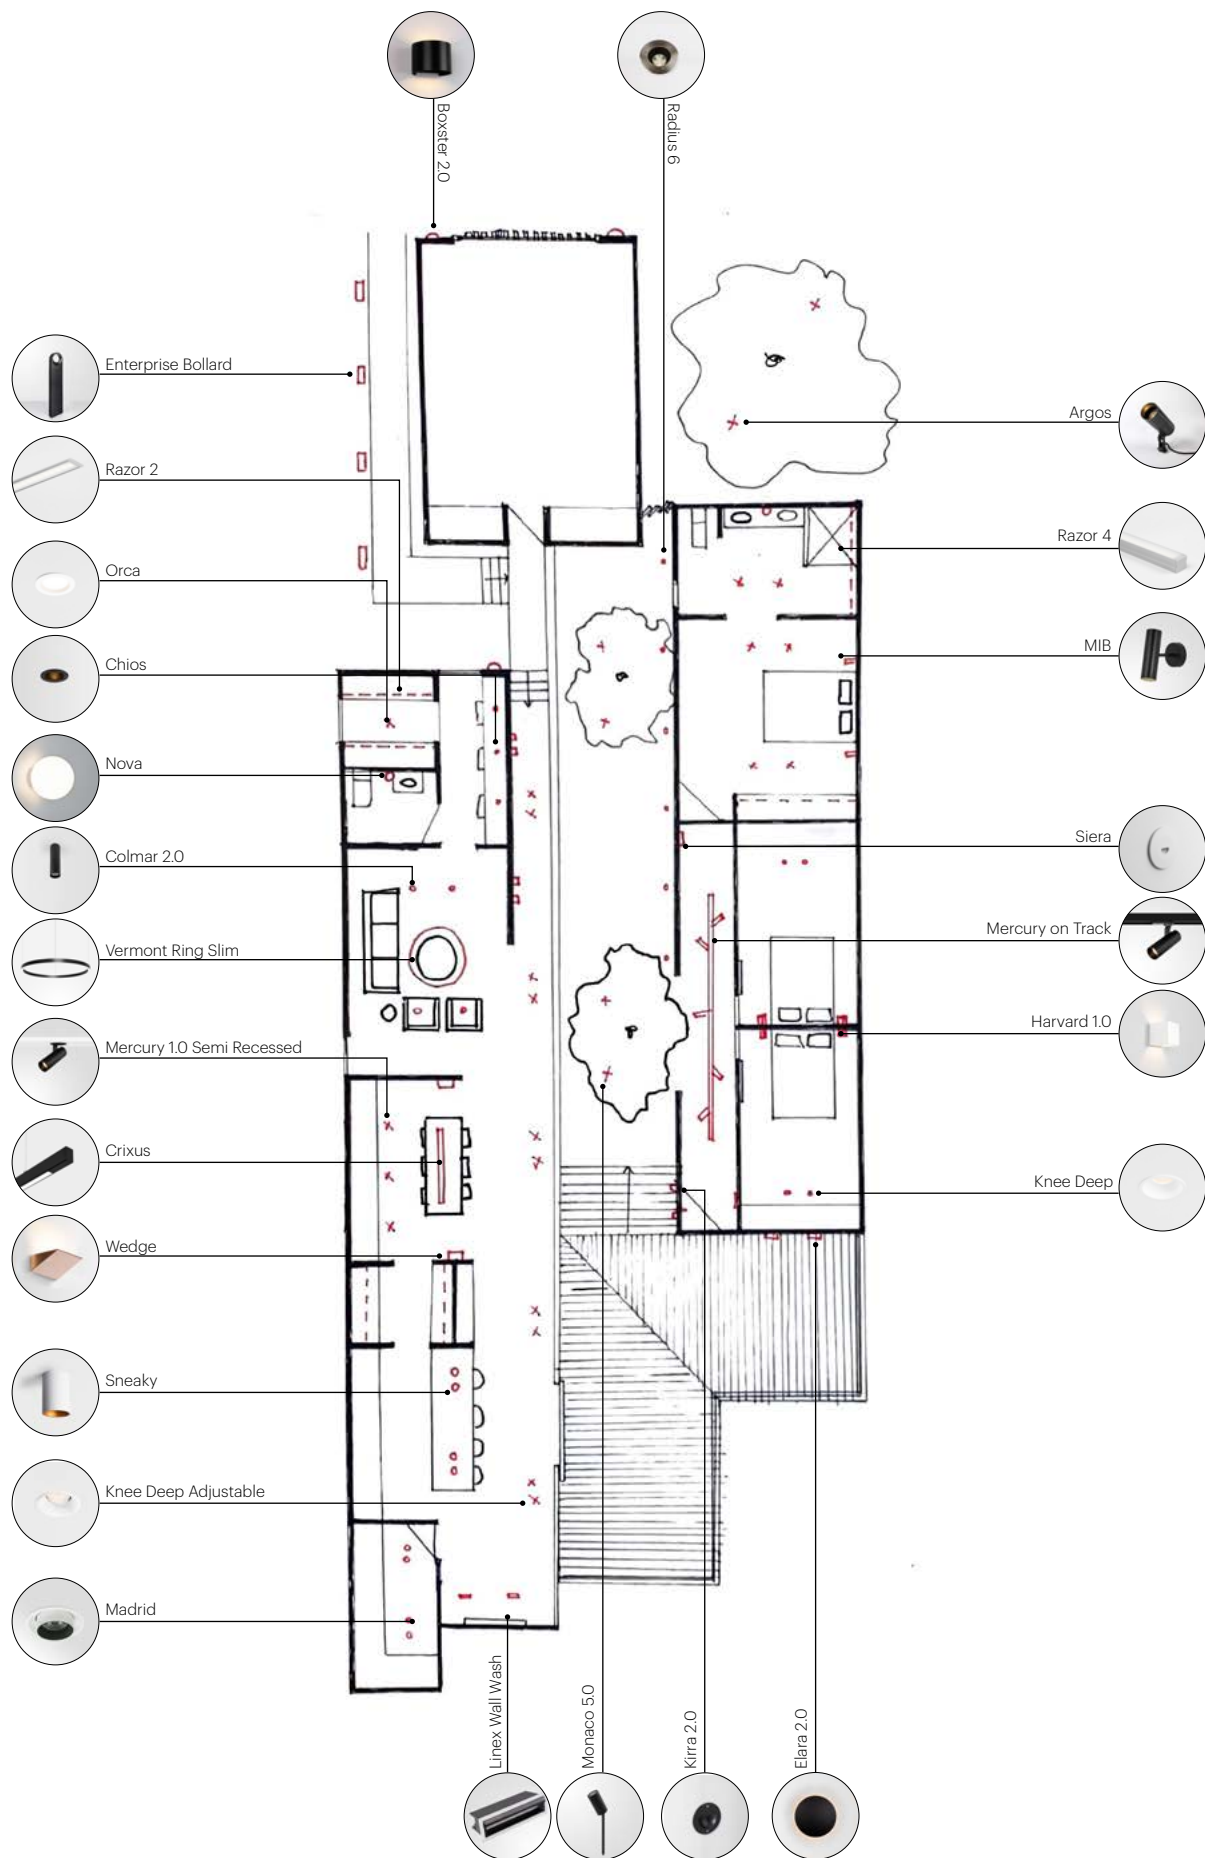

Bringing your projects to light.

We are a professional, dedicated and experienced team providing lighting solutions for residential, retail, commercial and industrial projects.

Our lighting consultants provide architects and designers with access to the best in lighting products through our world-wide network of suppliers and manufacturers. Our products will perform both functionally and aesthetically in a way that fundamentally contributes to the overall design.

With our new Essentials Range, lighting selection for your project has never been easier.

The Calile Hotel

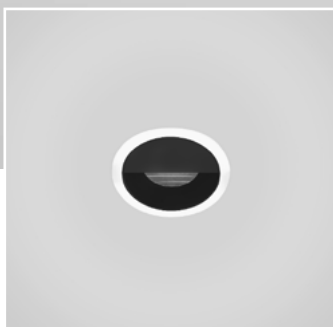

The Calile Hotel brings an unprecedented luxury resort experience to Brisbane's urban centre. Architects Richards and Spence "looked towards other hot weather cities, like Miami, Palm Springs, Rio De Janeiro and Mexico City to inform the hotels resort focused design." A deliberate choice was made to forgo the traditional corporate market and style focused on by other CBD based hotels. Instead, the 175 room hotel makes the most of Brisbane's balmy climate with naturally ventilated rooms, open-air garden corridors, large windows and the focus on communal spaces. With the hotel wrapped around a central pool, which is flanked by private yet breezy cabanas and outdoor dining.

The Calile Hotel sets a new standard in inner city hotel design, with a "tropical vernacular" established through the use of generous gardens, curved ceilings and archways, suspended mezzanines and a warm colour palette. The hotel's rooms and suites are bounding with personality, split into monotone pink, blue or green colour palettes, complimented by brass, cork and timber fittings and fixtures.

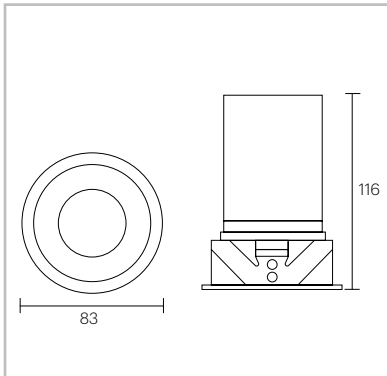

Caribou worked closely with Richards and Spence to deliver a range of lighting products to complement the well-conceived space. Working within a pared back colour palette of black and brass and sleek modern style products, the lighting design focus turned to the use of repetition to create impact. Each product was chosen to blend into and enhance the space, rather than make an individual statement. Caribou are proud to have worked on such a stunning, highly detailed project with a large range of top class suppliers and clients.

36 Malinya Drive, Buddina

This project showcases the impressive architectural lighting installation at a duplex located in the scenic coastal suburb of Buddina, Queensland. The project aimed to elevate the aesthetics, functionality, and sustainability of both indoor and outdoor spaces through carefully curated lighting solutions.

The lighting design concept was centered on three key principles: a. Enhancing Aesthetics: To illuminate architectural features, accentuate design elements, and create visually stunning effects both indoors and outdoors. b. Optimizing Functionality: To ensure adequate task lighting, adequate brightness, and well-lit spaces for various activities. c. Emphasizing Sustainability: By incorporating energy-efficient lighting solutions and integrating natural lighting sources.

The installation at the Buddina project successfully demonstrates how the strategic use of lighting can transform a residential space into a captivating and inviting haven. The harmonious interplay of indoor and outdoor lighting has not only enhanced the aesthetics and functionality of the duplex but also contributed to sustainability and energy efficiency, making it a truly remarkable showcase of modern lighting design.

Amalfi, Gold Coast

Not a single inch of this Jared Poole designed home has been left wondering. Inspired by the glamour and grace of globally recognised boutique hotels, and built by award winning builder Mactech Constructions, this uniquely modern Main River masterpiece is set on 673m of prime riverfront land in arguably one of the Gold Coasts most in demand suburbs.

Caribou Lighting was the exclusive solutions provide for the architectural lighting for this majestic home. Architectural lighting goes beyond simply illuminating a space; it is an art form that accentuates the architectural beauty and unique design elements of the home. When thoughtfully incorporated, it can transform a house into a warm, inviting, and visually striking living environment.

Gold Coast's architecturally designed homes often boast unique features like high ceilings, open floor plans, and impressive facades. Strategic lighting can accentuate these features, making them the focal points of the home. Cove lighting, for instance, can draw attention to stunning ceiling designs, while wall-washing techniques can emphasise textured walls or artwork. These methods not only add depth to the space but also showcase the craftsmanship that goes into designing these homes. This has all been achieved within this home.

California Tacos

The Gold Coast, known for its vibrant food scene, is constantly welcoming new culinary adventures. The latest addition to the city's gastronomic landscape is "California Tacos," a restaurant that takes diners on a delicious journey to the Golden State of California. With its fresh and vibrant flavors, this eatery brings the laid-back, sun-soaked charm of California straight to the heart of Queensland.

California Tacos is all about embracing the spirit of the West Coast, from the Pacific Ocean to the majestic Sierra Nevada mountains. The menu is a testament to the diverse and eclectic flavors found across California.

Caribou Lighting was proud to work with retail design specialist, Nancy Vuong, from NV Design Agency to deliver the lighting outcomes for this beautiful restaurant. Products included our versatile track mounted spot light system, Mercury, along with other popular fixtures including our Knee Deep, Nova glass ball wall lights and of course our Razor custom linear profile systems.

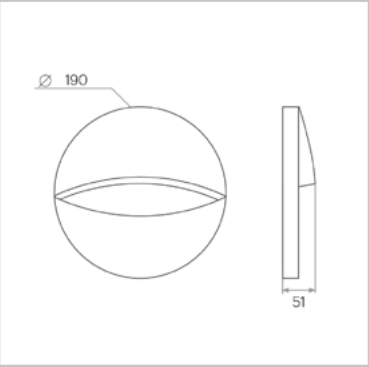

California Tacos is a welcome addition to Gold Coast's culinary scene, bringing the vibrant flavors and laid-back charm of California to Queensland. With its diverse menu, fresh ingredients, and commitment to sustainability, this restaurant is not just a place to eat but an experience that transports diners to the sunny shores of the Golden State. Whether you're craving tacos, burritos, or a refreshing cocktail, California Tacos has something to offer every palate. So, make sure to visit soon and embark on a delightful culinary journey to California without leaving the Gold Coast.
